Summary

Full-stack developer focused on fundamentals, interested in AI-assisted development and AI integration.

Education

King Mongkut's Institute of Technology Ladkrabang — Chumphon, Thailand
Bachelor of Engineering in Computer Engineering, GPA 3.76 — 2023 - Expected 2027

King Mongkut's University of Technology North Bangkok — Bangkok, Thailand
Pre-Engineering in Electrical Engineering, GPA 3.10 — Graduated 2023

Experience

Full-Stack Developer Intern, SCG Thung Song - Nakhon Si Thammarat, Thailand — May 2025 - Present

- Rebuilt a legacy Express fleet system in NestJS and Next.js on its existing SQL Server, at feature parity
- Built an AI assistant for fleet questions and booking forms, using an LLM router with code-driven workflows
- Isolated each company's data by scoping every query to the user's companies and role
- Implemented JWT auth with rotating refresh tokens and token-reuse detection
- Built validated Excel imports for GPS and fuel data that feed cost and utilization dashboards
- Gathered requirements and designed user flows for a plant digitalization system

Projects

TasteTrail | *Next.js, TypeScript, Zustand, Tailwind CSS* — Jul 2025 - Oct 2025

- Built the frontend of a restaurant review platform in a 4-person team
- Built review, restaurant management, and map features

POS System | *Next.js, TypeScript, Zustand, Tailwind CSS* — Aug 2025 - Sep 2025

- Built the frontend of a point-of-sale web app with barcode checkout, receipt printing, and a sales dashboard
- Implemented role-based route protection in Next.js middleware

Technical Skills

Languages: TypeScript, JavaScript, Python, SQL

Frameworks: Next.js, React, NestJS, Express, FastAPI

Libraries: Tailwind CSS, Zustand, TanStack Query, React Hook Form, Zod, LangChain

Databases & ORM: PostgreSQL, SQL Server, Prisma, Drizzle

Developer Tools: Git, GitHub, Docker, Postman, Claude Code
